<tr>
<th>Program</th>
<th>Criteria</th>
</tr>
</thead>
</table>
| Emergency Med        | One research project during the residency, approved by RPD and submitted to ACOEP  
|                      | - End of OGME2: outline for the project: implementation and data collection methods  
|                      | - End of OGME3: interim report  
|                      | - Middle of OGME4: final product suitable for publication  
| Family Practice      | Residents must complete a research or scholarly activity during course of residency. Options include  
|                      | - Resident research projects within the department of family medicine.  
|                      | - Institutional research programs in which the department of family medicine is actively involved.  
|                      | - Original paper on health care related topic.  
|                      | - Presentation at a state, regional, or national meeting.  
|                      | - Authoring a grant.  
| Internal Medicine    | One scholarly project that is approved by the program director and submitted for publication or presented at a scientific meeting  
|                      | OR participate in two critiqued evidenced-based presentations.  
| Cardiology Nephrology| One research project and submit a research paper to ACOI during fellowship. If the project is a case report, it must be submitted six months prior to the completion of the fellowship. If the project is a report of an original clinical research study, the report must be submitted by the completion of training.  
| Neurology            | One professional paper during the course of the program, pertinent to neurology, which is suitable for publication; submitted to ACONP  
| OBGYN                | One research project with status update to ACOOG as part of annual report. Options:  
|                      | - Original research studies (basic science, clinical studies, health sciences) or retrospective studies (medical records analysis)  
|                      | - Case series to include a review of the literature  
| Radiology            | Residents must complete a research paper suitable for publication and presentation once during the course of the program. Resident must present at least once at AOCR Annual Convention by third year of residency (OGME4) - guidelines and forms available online at:  
|                      | [http://www.aocr.org/displaycommon.cfm?an=1&subarticlenbr=4](http://www.aocr.org/displaycommon.cfm?an=1&subarticlenbr=4) Options include: laboratory research, clinical research, retrospective analysis of data from patients. Timeline:  
|                      | OGME2: Review proposal with RPD  
|                      | OGME3: Gather data, prepare abstract  
|                      | OGME4: Present at AOCR  
| Surgery General Neurological | Annual (OGME2 and up) scholarly activity requirement. Narrative description submitted to ACOS with annual report. Project options  
|                      | - Scientific research paper (1500 words) or poster presentation at ACA  
|                      | - Community based quality improvement program – education, medical mission, etc.  
|                      | - Medical education quality initiative  
|                      | - Practice improvement outcome – root cause analysis; initiative based on published guidelines, etc.
