

Fast and Easy Online Access to:
Imaging Reports, Key Images and Patient Status

Garden City Hospital has purchased a software product known as the AMICAS® Vision Reach. This product will enable referring physicians to have a direct link with Imaging Services for their patients testing. One of the key features that physicians can expect when signing up for this product, is to receive reports and key images of their patients test results electronically.

Other Key Features

- Physicians may select multiple forms of electronic notification of their patients test results.
- Online, secure viewing of imaging reports.
- Viewing of key radiology images.
- Ability to check on the patient/report status.

Benefits

- Facilitates and speeds physician collaboration on patient diagnosis.
- Eliminates your need to store paper copies of reports or film copies.
- Reduces or eliminates the need for faxing of reports.
- Check patient and report status in “real time”.
- Select when and how you would like to receive e-mail notification about reports.

Physician Features

- Upon report completion, an e-mail notice with a link to the report is sent to you. Click on the link from any e-mail enabled device and enter your username and password to access the report.
- Imaging reports will include embedded key images associated with the study.
- Ability to grant viewing access to other physicians.
- Order new/follow-up exams electronically.
- Report integration capabilities with IDOC.
- No software or plug-ins needed to be downloaded to access reports.
- Training and support provided by Garden City Hospital Imaging Services and Cardiology staff.

To take advantage of AMICAS® Vision Reach and to set up an appointment, contact Centralized Scheduling at (734) 458-4366 or email us at CentralizedScheduling@primehealthcare.com. She will provide you and your staff with the confidentiality security agreement that must be signed. The team will then do one-on-one training with you and give you your sign-on information.
